

MediKnow Sample Healthcare Knowledge Base

This fictional document is created for learning Retrieval-Augmented Generation (RAG). It contains realistic healthcare policies, procedures, and FAQs.

1. Patient Admission Policy

Patients should present a valid government-issued ID and insurance card during registration. Emergency patients receive immediate triage before administrative registration. Planned admissions should arrive 30 minutes before the scheduled appointment.

2. Infection Prevention

Healthcare workers must sanitize hands before and after every patient interaction. Personal protective equipment (PPE) is mandatory in isolation areas. High-touch surfaces should be disinfected every four hours.

3. Medication Safety

Medication orders must be verified using two patient identifiers. High-alert medications require an independent double-check by another qualified clinician before administration.

4. Patient Discharge

Before discharge, clinicians must explain medications, follow-up appointments, warning signs, and lifestyle recommendations. Patients receive written discharge instructions.

5. Data Privacy

Patient medical records are confidential. Access is granted only to authorized healthcare personnel. Electronic records must not be shared through personal email accounts.

6. Frequently Asked Questions

Q: What happens if a patient arrives without insurance documentation? A: Registration proceeds if clinically appropriate, but billing verification must be completed later. Q: When is PPE mandatory? A: PPE is mandatory in isolation rooms and whenever exposure risk exists.
